IMPACT PLATES

Impact plates are steel plates integrated with the mounting bracket that provide additional impact support towards the outsides of the bumper guard. Without impact plates any bumper guard is susceptible to folding in on the outside in the event of an off-center impact. This feature is exclusive to HERD products.

LIFT ASSIST

Herd Lift Assist REDUCES lift weight by up to 75%. Our exclusive, patent-pending design, Herd has become the lightest to lift. What does that mean to you? Our most popular Aero and Defender series bumpers now have a lift weight of as little as 13 pounds!
