► Truck Guard Series*

Founded in 2002, HERD is one of North America's leading vehicle guard companies. Whether you're looking for something that mounts over your existing bumper or replaces it altogether, we're committed to offering a full line of protection products for today's trucks.

Engineered specifically for your truck

DEFENDER 4 POST

Protect the entire front end of your vehicle, including your headlights and grill, by removing your factory bumper and replacing it with a HERD truck guard. Our products mount directly to the frame and are engineered specifically for each make and model, meaning they're built to last and look great doing it.

Aluminum construction

HERD truck guards are made from aluminum and polished to a mirror-like finish through a proprietary, five-step process. This lightweight material is strong, flexible and cost effective.

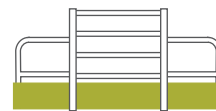

Products as strong as our word

We guarantee that you'll be as proud standing in front of our guards as we are standing behind them. If you're not completely satisfied with the durability and design of your purchase, let us know and we'll make it right.

Customize your HERD

HERD truck guards come in a set of standard designs, with premium upgrades available. To choose the product that's right for you, select from the options below based on your preferred look and style.

Bumpers

12"

18" (aerodynamic)

18" (flat)

3"

4"

Other

Without lower rake

Row of 2" Lights

Standard on all designs

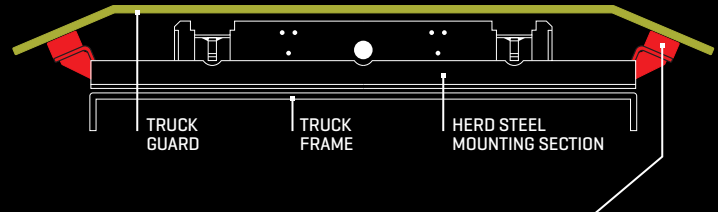

Impact Plates

Mirror Polish

Raise and lower your bumper as easily as a tailgate with Slam Latch and Lift Assist

Slam Latch

With one-click engine access, pre-trip inspections and routine maintenance have never been easier. Simply remove the tow pin, release the latch and lower the guard. Never tighten an eye bolt again.

Lift Assist

Reduce lift weight to as little as 13 pounds with our patent-pending technology. As you lower your HERD guard, springs are loaded to help you bring it back to an upright position as easily as possible.

Impact Plates

Made from high-grade steel and a rubber/lumber composite, our impact plates reduce folding in the event of an off-center impact. They're integrated with the mounting bracket and come standard on our aluminum guards.
